Education

Pandit Deendayal Energy University

July 2023 - July 2027

Bachelor of Technology in Computer Science and Engineering (CPI: 9.16, Till 6th Semester)

Gandhinagar, Gujarat

Experience

iNavLabs Pvt. Ltd.

15/05/26 – Ongoing

Software Development Intern

Gandhinagar, Gujarat

- Delivered 2 client applications end-to-end as a Forward Deployment Engineer – an ERP system and a vending-machine distributor/operator platform – owning each client relationship from requirements through deployment.
- Built several forward-deployment demo projects using the company's core product API to pitch to prospective leads and clients, including 2 proposals presented to Pandit Deendayal Energy University (PDEU); fixed critical bugs such as a cascading-delete error and an infinite-loop bug that risked burning through a large volume of API tokens (potentially several dollars per occurrence).
- AI Interview Platform – Built a fully customizable full-stack voice-based mock-interview platform (Next.js, Supabase) supporting any interview subject, adjustable difficulty, and 4 selectable interviewer personas (strict, friendly, hardcore, etc.); powered by a custom voice API achieving 400ms latency, 68% faster than the 1250ms industry standard, with automated interview grading for realistic, human-like sessions.
- Maa ERP – Delivered a fully customized, role-based ERP (Next.js, Supabase) for a mining & logistics client, digitizing their entire paper-based billing system with automated invoice generation, OCR-based challan auto-cropping, and centralized ledger management.

Projects

AlgoRank – Competitive Programming Analytics Platform (Live Project) | *Next.js, Tailwind CSS, Appwrite, 2026*
Recharts, SheetJS

- Built a unified coding analytics dashboard aggregating LeetCode and Codeforces data with a custom AlgoScore, sortable leaderboards, and advanced filters.
- Implemented OAuth with invite onboarding, optimized API sync via caching, and developed Recharts-powered performance analytics with Excel export support.

Attendease – Full-Stack Attendance & IA Management System | *Flask, SQLite, HTML, CSS, JavaScript, Jinja2* **2024**

- Built a role-based academic management platform for attendance and internal assessments.
- Implemented anti-cheating tools, flexible attendance marking, CSV export, and a responsive UI.

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript, Node, JSP, Spring MVC

Developer Tools: GitHub, VS Code, Jupyter Notebook, Postman, pgAdmin, MySQL Workbench

Frameworks: Flask, Express.js, React.js

Cloud/Databases: PostgreSQL, MySQL, SQLite

Soft Skills: Problem Solving, Adaptability, Teamwork, Continuous Learning, Leadership, Communication

Core Fundamentals: DSA, OOPs, DBMS, Software Engineering, Web Development, Advance JAVA, Cloud Computing, Big Data Analysis

Achievements & Leadership

- Team Leader – Smart India Hackathon (SIH), Nodal Round Qualifier (2025). Led a team to develop a Data Sanitization Platform for E-Waste Circular Economy (PS 25070), focusing on secure data removal from discarded electronic devices to enable safe reuse and recycling.
- NPTEL Ethical Hacking – Elite + Gold (2025).
- 2nd Place – ACM Hackathon, PDEU (2024).
- LeetCode – Solved 200+ DSA problems with a current rating of 1600+.

Certificates

- AWS Skill Builder: AWS ML Engineer – Associate Learning Plan (2026).
- NPTEL: Ethical Hacking (2025).
- Harvard CS50's Introduction to Programming with Python (2022).
